About CDS 2025

CDS 2025, the annual summit is aimed to identify, manage and mitigate the digital risks that stems from using connected devices and systems to run your business. The cyber security market is projected to grow from USD 203 billion in 2024 and it is projected to expand to USD 542.3 billion by 2032, growing at a CAGR of 12.05% during the forecast period of 2024–2032.

The interconnected digital world, powered by e-commerce, smart devices, and cloud computing, has become a prime target for cyberattacks, driving robust market growth.

CDS 2025: Focus for Securing Digital India

The summit's comprehensive agenda offers a wide array of themes and topics tailored to the diverse interests of delegates. Multiple tracks enable participants to explore specific areas of interest, while interactive sessions, from keynotes to workshops, ensure an engaging learning experience. Beyond education, CDS enriches the delegate experience with networking opportunities, hands-on demonstrations, and practical insights into cutting-edge security solutions. This dynamic platform fosters collaboration between industry leaders, academics, and policymakers, driving innovation and problem-solving in the cybersecurity domain.

The **Annual Cyber & Data Security Summit** serves as a vital platform for keeping pace with emerging cybersecurity trends and preparing for potential challenges. This one-day event is set to bring together **200 delegates**, including policymakers, law enforcement officials, technologists (CIOs, CTOs, and CISOs), and value-added resellers (VARs) from across the country.

With a focus on collaboration and knowledge sharing, the summit aims to address critical issues in cybersecurity while showcasing the latest innovations and strategies for safeguarding data in an increasingly connected world.

Inaugural Session

8th Cyber and Data Security Summit 2024

Audience Profile

Prevention is better than cure. It is less expensive to prevent cyber-attacks than to repair the damage dealt from the cyber-attacks. Multiple organizations across industries lose a lot of money from cyber-attacks all the time. Therefore, it is imperative and highly important for all organizations to allocate correct budgets in their cybersecurity infrastructure.

CDS 2023 - vs - CDS 2024

CDS2024 - vs -CDS2025

Key-Take Away from CDS 2024

Cybercrime is projected to cost the world **\$9.5 trillion USD in 2024**, making it the third-largest economy after the U.S. and China if measured as a country. This figure is expected to grow by 15% annually, reaching **\$10.5 trillion USD by 2025**, driven by data destruction, theft, fraud, business disruption, and regulatory costs. The rapid adoption of mobile, cloud, IoT, and remote tools has fundamentally reshaped how technology is utilized, amplifying vulnerabilities to cybercrime.

Two major challenges facing organizations today are **data privacy** and **synthetic fraud**, which leverages fake identities for financial crimes. As businesses increasingly rely on data, safeguarding it from unauthorized access has become critical. In 2024, significant investments in data privacy compliance are anticipated as organizations tackle synthetic fraud's evolution, emphasizing prevention and detection to mitigate financial risks effectively.

AGENDA

OPENING SESSION

09:00 - 10:00 AM | Registration

SPEAKING SESSION

- 10:00 - 10:10 AM Lamp Lightening Ceremony
- 10:10 - 10:30 AM Welcome Address by
